"The ProMed solution which BizTech implemented here at Cooley Dickinson Hospital has reduced the paper handling requirements for our coders by nearly 90%, contributing to a 50% to 60% reduction in the time it takes to complete the entire coding process. We eliminated our coding backlog without hiring additional personnel."

ProMed has helped to improve our cash flow by enabling us to expedite billing, get money in the door faster, and reduce the number of days claims sit in accounts receivable."
